

## Dassault Aviation Releases iPad Maintenance App

**May 23, 2016 (Geneva, Switzerland):** – Dassault Aviation has developed and released “Falcon Maintenance Doc App”, a time saving application for iPads designed specifically for maintenance staff.

The new app provides Falcon maintainers with a user friendly interface, including a powerful search tool and the ability to create bookmarks and notes, export documents to e-mail and view several manual revisions at the same time – all while providing untethered mobility and freedom to move around the aircraft or hangar.

"The concept for Falcon Maintenance Doc originated from listening and responding to our customers' requests and adapting proven technology that is being rapidly embraced by the aviation community," said Jacques Chauvet, Senior Vice President of Worldwide Customer Service. "The FMD App is a new step to have less paper involved in execution of maintenance. It brings more flexibility and efficiency to our operators during maintenance operation and documentation process" added Chauvet.

The Falcon Maintenance Doc App is available through the Apple Store. iTunes is required to upload PDF collections (available on a Dassault-provided USB flash drive) to the iPad. It is free of charge for all Falcon customers with a valid FIELD subscription (Falcon Interactive Electronic Library Documentation).

The App is part of an effort aimed to incorporate new web technologies to better serve Falcon customers. In 2015, Dassault Aviation introduced Falcon Flight Doc, an iPad App dedicated to flight documentation for Falcon pilots.

### **Notes for Editors**

**Dassault Falcon** is the recognized global brand for Dassault business jets which are designed, manufactured and supported by Dassault Aviation and Dassault Falcon Jet Corp.

### **About Dassault Aviation**

Dassault Aviation is a leading aerospace company with a presence in over 90 countries across five continents. It produces the Rafale fighter jet as well as the complete line of Falcons. The company employs a workforce of over 11,000 and has assembly and production plants in both France and the United States and service facilities around the globe. Since the rollout of the first Falcon 20 in 1963, over 2,400 Falcon jets have been delivered. Dassault offers a range of six business jets from the twin-engine 3,350 nm large-cabin Falcon 2000S to its new flagship, the tri-engine 6,450 nm ultra-long range Falcon 8X.

**About Dassault Falcon Jet**

Dassault Falcon Jet Corp. is a wholly owned U.S. subsidiary of Dassault Aviation, France. Dassault Falcon Jet markets and supports the Falcon family of business jets throughout North and South America.
