

Dassault Offers Pro Line 21 Upgrade for Falcon 50EX, 2000 & 2000EX Operators

May 23, 2016 (Geneva, Switzerland): – Dassault Aviation is now offering the comprehensive package of Pro Line 21 avionics upgrades to operators of Falcon 50EX, Falcon 2000 and Falcon 2000EX aircraft.

The Rockwell Collins Pro Line 21 is a family of avionics solutions that uses new capabilities in display, sensor and flight management technology to help operators meet constantly changing operational, regulatory and performance requirements.

“This customized OEM-driven Pro Line 21 cockpit upgrade package, previously available through Rockwell Collins, ensures that out of production models can benefit from Next-Gen air traffic management technologies that enhance situational awareness and optimize aircraft operational capability,” said Jacques Chauvet, Senior Vice President Worldwide Customer Service. “It’s part of Dassault’s ongoing commitment to enable customers to continue to access the top notch modernization solutions they need with the highest standard of service on the market.”

The upgrade offers a mix of hardware and software solutions, including navigation capabilities like LPV and improved situational awareness features like SVS, electronic charts/maps and XM weather overlay that will allow operators to access a larger number of airports with increased levels of safety and efficiency. It will come with a full package of services including Falcon-specific pilot training tailored to company-level standards and all associated certifications.

The new STC will ensure turn-key compliance with FANS 1/A, ADS-B, WAAS/SBAS and other new air traffic management requirements while providing a clear roadmap for future ATC mandates and enhancing aircraft value and lifespan.

Pro Line 21 can be installed at any Dassault Aircraft Services (DAS), Dassault Falcon Service (DFS) facility or by any Falcon Authorized Service Center (ASC).

Notes for Editors

Dassault Falcon is the recognized global brand for Dassault business jets which are designed, manufactured and supported by Dassault Aviation and Dassault Falcon Jet Corp.

About Dassault Aviation

Dassault Aviation is a leading aerospace company with a presence in over 90 countries across five continents. It produces the Rafale fighter jet as well as the complete line of Falcons. The company employs a workforce of over 11,000 and has assembly and production plants in both France and the United States and service facilities around the globe. Since the rollout of the first Falcon 20 in 1963, over 2,400 Falcon jets have been delivered. Dassault offers a range of six business jets from the twin-engine 3,350 nm large-cabin Falcon 2000S to its new flagship, the tri-engine 6,450 nm ultra-long range Falcon 8X.

About Dassault Falcon Jet

Dassault Falcon Jet Corp. is a wholly owned U.S. subsidiary of Dassault Aviation, France. Dassault Falcon Jet markets and supports the Falcon family of business jets throughout North and South America.
