

Sogitec

DIGITAL INNOVATION FOR
SUCCESSFUL FLIGHTS

International Paris Air Show, June 2017

SOGITEC AT THE PARIS AIR SHOW

A Dassault Aviation subsidiary, SOGITEC INDUSTRIES is a leading provider in support products and services via its expertise in Simulation, Training, and Technical Publications. Sogitec exhibits at the International Paris Show, hall 2A, booth C252.

Provider of Support Solutions for Rafale

Sogitec is the reference provider of support solutions for Rafale domestic and export programs: simulators for crews' tactical training, technical publications and techpubs information systems for maintenance operations, tools and services for pilots' and maintenance personnel's training. At the International Paris Air Show, Sogitec presents its full offer to Forces operating the Rafale

Simulation for Collective Training

For the first time within a major international aerospace show, simulation for collective training will be highlighted through the demonstration of a full training scenario implementing a Rafale simulator, a remotely piloted aircraft system (generic) simulator, and the structure for supervising and monitoring distributed simulated exercises: DMOS (Distributed Mission Operations System). This demonstration benefits from Sogitec's experience in distributed simulation (Rafale Simulation Centers and NH90 simulators), an in-depth knowledge of the importance of collective training for the Armed Forces, and ongoing research and development.

Innovation, the core of Sogitec's DNA

An innovative company at heart, Sogitec seizes the opportunity of the International Paris Air Show to introduce the current state of its R&D in the innovative fields of augmented (AR) and virtual (VR) reality for its customers' activities: visualizing technical publications solutions (AR), maintenance training (VR),...
