## **"Aboard the Rafale", Dassault Aviation's new fun and educational application**

**Saint-Cloud, France, November 07, 2019** – With its new “Aboard the Rafale” application, Dassault Aviation aims to raise understanding of the fundamental principles of aircraft flight.

This fun but educational application has theoretical phases, offering a series of simple animations to help you understand the combined effects of the forces acting on an aircraft in flight.

After each explanatory phase, “Aboard the Rafale” also allows you to take the controls of Dassault Aviation’s flagship fighter plane! Each user can test their control of the aircraft by going through the center of the virtual targets on each of the five increasingly difficult routes, and take part in a “buddy-buddy” in-flight refueling mission.

Fully compatible with Oculus Rift virtual reality headsets, “Aboard the Rafale” allows those equipped with the headsets to benefit from an even more immersive 360° experience!

The “Aboard the Rafale” application is available for free download now on the following website:
