

Come meet Dassault Aviation at the “Defence Factory” event...

To promote the spirit of defense, strengthen the connection between the Armed Forces and the Nation, and foster a strategic European culture: these are the aims of the first edition of this event, which is unique in Europe. It will be taking place on January 17 and 18, 2019, at the Paris Event Center.

This participative and innovative project, organized by France’s Ministry of the Armed Forces, is being managed by the Department of International Relations and Strategy (DGRIS), with support from the École Militaire’s Institute for Strategic Research (IRSEM).

Dassault Aviation can be found at the GIFAS stand, with other manufacturers and partners: Aérocampus, Airbus, Ariane Group, Safran, and Thalès.

The Dassault Aviation space presents the role of System Architect. There are also two scheduled demonstrations:

- Rafale Immersive Practical Training

Training and troubleshooting tool for mechanics, using the virtual reality digital model of the Rafale. It expands knowledge of the cockpit systems and cuts the time required for training, without grounding a plane.

- 3D Scanner Presentation

The 3D laser scanner is a latest-generation portable metrology tool. It enables the digital acquisition of the coordinates of points in space and the analysis of the distortion of a pattern projected on a surface.
